

decotric Cork Adhesive

decotric Korkkleber

Brown pigmented, ready-to-use dispersion adhesive for cork plates.

Instructions for use:	For glueing of cork plates and cork webs as well as polystyrene plates, Depron plates and the like onto wall and ceiling surfaces, for indoor use.	
Technical data:	Components:	Styrene-acrylate dispersion
	Density:	1.8 g/cm ³
	pH value:	8-9
	Consumption:	approx. 700 g/m ²
Surface preparation:	The surface must be slightly absorbent, stable, free of dust and grease. Remove any loose masonry, old wallpapers and glue-bound distempers. Mend cracks and holes with <i>decomur Super Bonding Filler</i> or <i>decofill Interior</i> . Pretreat strongly absorbent, sanding and chalking surfaces with <i>decotric Deeply Penetrating Primer - Solvent Free</i> .	
Application:	Apply an even layer of <i>decotric Cork Adhesive</i> onto the surface or, if necessary, onto the plates or webs using a serrated trowel (toothing B2). When applying the glue, only coat as much surface that can be laid with cork plates within 15 minutes.	
	Afterwards, insert the plates or webs into the wet adhesive bed and press on evenly. Rectification of the plates and webs in the glue bed is still possible for a short time.	
	The processing instructions of the cork manufacturers must be complied with.	
	Remove any adhesive residues immediately with water. Clean any working equipment with water immediately after use. Do not process below +5° Celsius sub-floor and room temperature!	
Storage:	Keep cool but protect from frost. Keep container well closed!	
Available sizes:	4 kg bucket	001302001
	8 kg bucket	001303001
