

# decofill Ready mix filler - Tube

## decofill Fertigspachtel

### Area of application:

Ready-to-use, white filler for filling small cracks and holes and for levelling uneven surfaces indoors. decofill Ready-mixed Filler is particularly easy to smooth and, once dry, can be sanded to a high finish if required. Can be used on all mineral substrates (e.g. concrete, masonry, gypsum, lime and cement plaster), painted surfaces and similar.

### Properties:

- For walls and ceilings
- Very easy to sand
- For indoor use

### Technical data:

Raw material base: Plastic dispersion, mineral components, water, additives

Density: approx. 1.8 g/cm<sup>3</sup>

pH value: 8 - 9

### Substrate preparation:

The substrate must be dry, stable, dust-free and free of grease. Prime highly absorbent, sandy and chalky substrates if necessary.

### Instructions for use:

Knead the tube well before use. Press decofill ready-mixed filler into the damaged area and smooth with a spatula. For full-surface application, max. layer thickness 5 mm. Once completely dry, the filled areas can be painted, wallpapered or covered.

### Notes:

Do not use below +5 °C. Clean tools with water immediately after use. Not suitable for filling work on glass, plastic and metal.

Please refer to the safety data sheet for safety-related information. Current safety data sheets are available on our website [www.decotric.de](http://www.decotric.de) or at [sds@decotric.de](mailto:sds@decotric.de).

### Storage:

Store containers tightly closed and in a cool place, but not exposed to frost. Keep out of reach of children.

### Disposal:

Only recycle containers that are completely empty. Dried material residues can be disposed of with household waste or as construction waste. Dispose of uncured residues in accordance with EWC waste code no. 08 04 10.
