

decotric Fungicidal Paint Additive

decotric Anti-Schimmel-Konzentrat Fungizider Farbzusatz

Protects against mould, algae, green and bacteria.

Instructions for use:

decotric Fungicidal Paint Additive can be used to easily and lastingly protect water-based products – such as emulsion paints, wallpaper adhesives, distempers, primers, etc. – against microbial infestation. *decotric Fungicidal Paint Additive* is also ideally suited for renovating surfaces before the subsequent wallpapering and painting works. *decotric Fungicidal Paint Additive* can be used on all absorbent surfaces – such as plaster, stone, concrete, aerated concrete, masonry, etc.
Not suitable for treating wood.

Technical specifications:

Components: bactericides, fungicidal combination of active substances
Density: approx. 1.04 g/cm³
pH-value: 5-7

Application:

As an additive to emulsion paints, wallpaper adhesive and similar water-based products:

Stir 250 ml *decotric Fungicidal Paint Additive* into 10-15 l emulsion paint or similar and use as usual.

As surface renovation for interior and exterior use:

Clean the surface. Thin 250 ml *decotric Fungicidal Paint Additive* with 7 l water. Brush on plenty of the mix to the affected areas, twice, wet on wet, and leave to completely dry before continuing.

Important information:

Please see the EU Safety Data Sheet for all safety-related data (EU-CLP).

Storage:

Store in a cool, but frost-free place. Keep container tightly closed.

Available size:

250 ml PE bottle 005606001
