

decotric Joint Repair white decotric Fugen-Reparatur weiß

Ready-to-use, premium synthetic resin filling compound for the quick repair of tile joints indoors in three colour shades.

Instructions for use:	<i>decotric Joint Repair white</i> is perfectly suitable for repair work on joints of ceramic and glass tiles, tiles and mosaics. <i>decotric Joint Repair white</i> is not suitable for floors.	
Technical specification:	Components:	Styrene-acrylate dispersion, filling material and additives
	Colours:	white
	Density:	approx. 1.80 g/cm ³
	pH value:	approx. 8-9
	Drying period:	4-7 hours depending on coating thickness, surface absorbing capacity and ambient temperature
Surface preparation:	The joints to be repaired must be dry, stable and free from parting compounds (dust, grease, soap residues, etc.). Remove loose material from the joints by scraping them out.	
Application:	<p>Knead tube well before each use. Press <i>decotric Joint Repair white</i> directly into the damaged places and carefully remove any protruding filler using a rubber spatula, for instance. The repaired joint must be filled in without any gaps. The tiles need to be cleaned using a damp cloth or sponge before the filler has fully dried through.</p> <p>Porous, matte and unglazed tiles must be covered before grouting (e.g. with adhesive tape). The mends will be waterproof once <i>decotric Joint Repair white</i> has fully dried.</p> <p>Do not process below +5° Celsius sub-floor and room temperature! Clean tools with water immediately after use.</p>	
Storage:	Keep in a cool and frost-free place. Keep the containers tightly sealed!	
Article no.:	004201001	
Available size:	PE stand-up tube of 400 g each
