

decotric Saltpetre Remover

decotric Salpeterentferner

For removing efflorescence from plaster, concrete and masonry

Instructions for use:	<i>decotric Saltpetre Remover</i> quickly and effectively removes efflorescence from plaster, concrete, masonry, clinker, and similar surfaces.	
Technical specifications:	Basic raw materials:	Tensides (surfactants) and phosphoric acid
	Density:	1.05 g/cm ³
	pH-value:	approx. 1
	Usage:	approx. 100 ml/m ²
Surface preparation:	Use a small test area of the surface to check its compatibility first before applying, as the acid can corrode non acid resistant surfaces such as marble, artificial stone, etc.	
Application:	<p><i>decotric Saltpetre Remover</i> is ready for use and is applied to the surface using a brush.</p> <p>After treating the surface, leave it to act for approx. 10 minutes and then wash off with plenty of water and leave the surface to dry.</p> <p>Ensure moisture can no longer penetrate the masonry to prevent the efflorescence from reappearing.</p> <p>Thoroughly wash tools with water immediately after use.</p>	
Important information:	Please see the EU Safety Data Sheet for all safety-related data (EU-CLP).	
Storage:	Store cool, but frost-free place! Keep the containers tightly sealed!	
Available:	1 l PE bottle	004701001
