

1568 decotric White Insulating Paint

decotric Isolierweiss

Does not contain aromatic compounds. Smooth surface, special coating for isolating water-soluble contaminations. For indoor and outdoor use.

Instructions for use:

decotric White Insulating Paint isolates water, nicotine, and soot stains, and similar soiling. Prevents the contaminations from showing through after being wallpapered over or after being coated with emulsion paints.

decotric White Insulating Paint can be used on all mineral surfaces (such as plaster, concrete, clay tiles, masonry, or similar) as well as on emulsion paints, synthetic resin plasters and gypsum boards.

Prevents salt efflorescence on all mineral surfaces, such as concrete, lime and cement-based plaster, clay tiles, etc.

Technical specifications:

Components:	Acrylic resin, pigments, solvent not containing aromatic compounds
Density:	approx. 1.25 g/cm ³
Colour:	white
Gloss level:	matt
Flash point:	approx. 57° Celsius
Usage:	approx. 200 ml/m ² per coat depending on the surface property

Surface preparation:

The surface must be dry, firm and free of release agents. Prime highly absorbent, sanding and chalking surfaces with *decotric Deeply-Penetrating Primer – solvent free*. Remove efflorescence mechanically (brush) or using *decotric Salt-petre Remover*.

Application:

Stir *decotric White Insulating Paint* well before use and apply to the areas to be isolated using a brush. When applying, ensure that a closed surface results without gaps. If applied to rough surfaces a second coat can be applied after the first coat has completely dried.

decotric White Isolating Paint is ready to use. Do not use with other paint systems. However, it can be thinned with max. 5 % thinner, free of aromatic compounds, e.g. *Reno-Inn Thinner - Aromatic Free*, to adjust its consistency. After it has completely dried the treated surfaces can be wallpapered or painted in the usual way.

Clean tools immediately after use with *decotric Brush Cleaner* or using *Reno-Inn Thinner - Aromatic Free*.

Do not use at surfaces or in rooms below + 5° Celsius.

Important information:

dangerous preparations directive (1999/45/CE)

Repeated exposure may cause skin dryness or cracking. May cause long-term adverse effects in the aquatic environment. Keep out of reach of children.

Avoid contact with skin and eyes. Use only in well-ventilated areas. Do not breathe vapour. Do not empty into drains, dispose of this material and its container at hazardous or special waste collection point. If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label.

ADR: UN 1263, 640 E, class 3, F1, pack-group III; LQ7, E1, D/E.

Is not subject to ADR due to chapter 2.2.3.1.5.

Storage:

Store in a cool place! Keep containers tightly sealed! Keep away from bare flames and ignition sources.
